

eZDocs™ Certified Electronic Medical Records (EMR) is designed to easily blend into your office flow to perform daily activities including provider and patient scheduling, secured communication between you your staff and patients, quick recording of encounters.

Developed using the latest technology, eZDocs™ is all ready to empower you to achieve meaningful use. Just install it on one computer an access it from any computer in your practice. eZDocs™ EMR lets you get going with minimum investment and can seamlessly scales up to meet your practice growing needs.

□ **Features**

Patient and provider scheduling

Quickly schedule appointments, search for available dates using the 3 month calendar, view 1-7 days of appointments for a provider, view patients past appointments, no shows etc.

Reduce the time needed to book appointments for new patients while your staff is on the phone by quickly creating new patients with all necessary elements for meaningful use (record demographics criteria)

□ **Encounter Management**

eZDocs™ is designed to maximize physician's efficiency by displaying all critical information of the patient on a single screen and populating the encounter with information from the most recent encounter.

eZDocs™ provides you with tools to quickly build and manage your templates on the fly while you are completing your notes. As your practice evolves, our EMR grows with you to support your ongoing needs and requirements.

Context sensitive auto suggest feature allows you to easily search for different codes by just typing a few characters in the respective boxes.

Build your favorites list easily and view what others have added as their favorites all at the point of care.

eZDocs™ is designed with a high degree of flexibility and customization to easily blend with your needs – whether you are a solo physician or a multi physician / specialty.

eZDocs™ allows you to quickly compose, fax or email consultation and referral letters. The letters are automatically saved in the patients chart.

Patient handouts and education

eZDocs™ is one of the first few EMR's integrated with [National Library of Medicine \(NLM\)](#) to provide you with context sensitive patient education handouts. All information is available based on the patient's active problems and medications list. You will never need to maintain or search for any handouts.

Preventive Care and Disease Management

eZDocs™ provides you with more than 100 preventive care and disease management templates which provide you with adequate reminders and information at the point of care.

□ ePrescribing

eZDocs™ offers robust e-Prescribing module, which includes drug-drug and drug-allergy interactions and the ability to both print and transmit prescriptions electronically.

Two-way electronic connectivity to pharmacies via the Surescripts Electronic Prescribing Network™.

eZDocs™ is surescript certified via NewCrop and RelayHealth The Surescripts certification process ensures that eZDocs™ is able to send and receive electronic messages in accordance with the industry standards and that it is providing open choice for medication selection and dispensing location.

□ Integration with Quest and LabCorp

eZDocs™ is certified by Quest Labs for both orders and results. Send all Laboratory orders to Quest labs directly from the EMR and receive the results both in Quest labs (pdf) format and as discrete data into the EMR.

eZDocs™ is in process of certification with LabCorp for receiving results electronically.

We are more than willing to provide interfaces to any laboratory system that you desire, just let us know and we can get the process started at no charge to you.

□ Interoperability □

Your patients visit a wide variety of provider, hospitals and nursing homes, there is a growing need to electronically exchange medical data and demographic information. Interoperability, therefore is a critical component in any EMR to connect patients with primary care physicians, referring provider and other stakeholders to deliver a synchronized view of patient health history.

Health and Human Services has identified standards for sharing patient information across diverse medical systems. These include Continuity of Care Document (CCD) and Clinical Document Architecture (CDA). eZDocs™ is certified to use both standards to securely exchange patient health information within the medical community.

Billing

Eliminate paper superbills for good. eZDocs™ gives you a choice of three simple billing solutions

- Securely export electronically (XML format) to your existing billing service or Fax or Email superbills to your billing service.
- Switch to Dexter Solutions discounted billing service (eZBill™)
- Continue using your own billing software. We have integrated eZDocs™ with Medisoft V11 SP3 and above to automatically push / pull all required information to Medisoft once the superbill is created. This software is available free of cost to you.

Remote Access

Being a thin client (Browser) based EMR, eZDocs™ is easily scalable to meet your growing practice needs. You can access all your patient information from your home or a different
